

## **STEF BURGHARD**

### **RED**

We are pleased to announce "RED", a permanent installation by Stef Burghard.

The works of Stef Burghard (\* 1971) deal with economic and institutional conditions of contemporary forms of presentation. The Berlin-based artist is interested primarily in the structure and legibility of information – with the way in which it is communicated and presented; in this regard, his attention focuses on the artistic production as such and, in particular, on his own work.

For the cellar at Jan Winkelmann / Berlin, Burghard has created a spatial concept using various additions to give the space a second level beyond its storage function, as a display for the presentation of art.

As a site-specific and permanently installed work, Stef Burghard's structure as a whole takes on a significance that goes beyond the purely functional level of organizing space. As well as questioning the specific given functional context, the work touches on general paradigms of perception as discussed since the beginning of Modernism.

Opening hours: Tuesday to Saturday, 11 am to 6 pm.
